

Journey Into Quantum Physics

Bev Robinson

INTRODUCTION

God's ways are truly mysterious. You never know when He will do something that is completely different from the usual. About a year and a half ago I was getting such a strange impression and leaning I didn't think it was of God. But it would not go away. I felt I was to read chemistry. I am degreed in chemistry and still have my chemistry 101 book that I had as a college freshman. The thought would not leave me. So I pulled down my book, blew the dust off and began reading at the kitchen counter, starting at page one.

Ras came in and wondered what in the world I was doing. I read like I knew nothing about chemistry. I was amazed because God began revealing to me very interesting things about the atom. I saw the following things that backed up what I knew in Scripture. All things are made up of atoms, iron, carrots, puppies, ---everything. In the center of the atom is a nucleus which contains protons (positive charges) and neutrons (no charge-neutral). On the outside of the nucleus and inside the atom are electrons (negatively charged) and are orbiting the nucleus.

I knew all this as I had learned years ago, but I didn't remember the purpose of the neutron. So I began to look up the neutron's purpose. Couldn't find it in the book and started on the internet. It took a long time before I got the answer. In one place I read the neutron didn't have a purpose. I knew that wasn't right as God made everything with a purpose. I found what I was looking for in a article written by a professor in a small Midwestern college. The purpose of neutrons is to keep the positive charges in the nucleus stable. With this understanding, God brought to mind the following line of a Christian song made popular by Amy Grant. "Breath of Heaven hold me together." This song is about Mary the mother of Jesus a young woman pregnant out of wedlock needing help in keeping it together. The Breath of Heaven is the Holy Spirit.

Therefore if atoms are in every thing in the universe. God has so designed everything to be positive in its center. Wow! And the neutron which is much like the Holy Spirit keeps every thing stable and together when negative is swirling all around. Again Wow!

Do you know how fantastic this is and how it lines up with what the apostle Paul wrote in the letter to the Philippians and to all of us who read it now? Philippians 4:8-9 (MSG) Summing it all up, friends, I'd say you'll do best by filling your minds and meditating on things true, noble, reputable, authentic, compelling, gracious—the best, not the worst; the beautiful, not the ugly; things to praise, not things to curse. Put into practice what you learned from me, what you heard and saw and realized. Do that, and God, who makes everything work together, will work you into his most excellent harmonies. God wants us to abide in the positive and we can do that by filling our minds with good things He has done in our live and not focused on all the negative swirling around us.

I had this happen on Saturday before I taught in my class on Sunday in our Church. The students there got real excited about what God had revealed.

There was a girl visiting from Maine in the class and afterward she asked me if I had ever done any studying of Quantum Physics. I told her I had a little but not much. I

studied classical physics in college. Some things she said really peaked my interest and I was off and running.

About ten years earlier I had read in a Christian book "Quenching the Spirit" about a quantum physics experiment the double slit experiment which change physics forever.

At this point in time there are two physics. One is classical physics and the other is quantum physics. Classical physics which is the physics which was the result of Newton's studies in the 1600s. and was studied for centuries. In the 1920s quantum physics was born as experiments could not be proven by classical physics experiments.

The double slit experiment was found by accident as the scientists were looking to find answers in another area. Doesn't that often happen? Like it did with my drawing to read chemistry. Chemistry was used by God to get me into quantum physics.

The bottom line of the double slit experiment was an observer affected how matter behaved. Awesome! There were two slits which light was passed through, and when there was no observer the light acted one way and when there was an observer the light passing through the two slits behaved another way.

We know what the word says about the power of prayer and of the spoken word, but what is so amazing here is just your presence affects matter. Your boots on the ground affects the atmosphere, matter, people all around you. This gives new meaning to this Scripture: Colossians 1:26-27 that is, the mystery which has been hidden from the past ages and generations, but has now been manifested to His saints , to whom God willed to make known what is the riches of the glory of this mystery among the Gentiles, which is Christ in you, the hope of glory.

So what does this mean? At school, in your office, in the grocery store, at home, where ever you are you affect your surroundings. We Christians take Christ with us always and even without saying a word he and we together affect matter. Scripture says this is a mystery. We are the ones who can walk into a room and it is changed for the better. Keep this in your memory and even in the forefront of your mind. You change things.
